CORE Package Installation

Central Controller Set up :

1. Plug the central controller into a power outlet.
2. Connect your mobile to the Orisha wifi (QR code).
3. Connect your controller to your wifi.
4. Install the Orisha app on your phone or computer.

Temperature and Humidity Sensor Set up :

1. Insert the batteries in your sensor.
2. In the middle of the greenhouse, hang the sensor at your plants' height.
3. Click on "Add +" in the Setting/Sensors/Temperature page.
4. Enter the number written under your sensor.
5. Go to Settings/Alerts and set up your personalized alerts.

Side Curtain Unit Set up :

1. Screw the unit to the wall and plug it into a power outlet.
2. Install the motor on the guiding rail.
3. Run the cable from the motor to the unit.
4. Plug the wires into their designated slots.
5. Set up your limit switches (QR code).

Temperature Program Set up :

1. In your app, go to Settings/Programs and add a temperature program.
2. Enter your desired temperature for Night, Morning and Day.
3. Repeat step 2 for each cloud coverage.
